Out-of-stock situation regarding Strangvac in Sweden resolved

Stockholm, October 21, 2024 – Intervacc AB (publ) announces that the shortage situation for the equine strangles vaccine Strangvac® in Sweden has been resolved and the vaccine is again in stock for distribution and sales. As previously announced, the shortage situation arose on October 1, 2024, and was expected to last until mid-October.

The company applied through a special procedure, Special Batch Release (SBR), to allow for the newly manufactured batches available for sale. The company can today announce that after receiving approval for SBR in Sweden, Strangvac® is available for immediate delivery in Sweden.

The procedure and processes, including Special Batch Release, vary in different countries, and the time to make Strangvac® available again in other markets will vary.

"We are very pleased that the Swedish Medical Products Agency has acted diligently, which has made it possible for Strangvac® to be available again for immediate delivery." commented CEO Jonas Sohlman.
